01-2204

Dowel/Dovetail/Detail Saw
6-1/2" 24 tpi

01-2205

Trim/Detail Double Saw
7" 19 & 24 tpi

This very flexible saw is made for flush cuts of dowels and woodworking plugs. Its extremely fine tooth count (26 teeth per inch) makes ultra-smooth cuts. Ideal for precision joinery like dovetails, small moldings, and picture frames, it can also cut small plastics. The Dowel/Dovetail/Detail Saw is an outstanding addition to the tool kit of any finish carpenter, woodworker, or craft worker.

Recommended For: Dowels, dovetail work, small pieces of wood and plastic, thin boards, balsa wood, wooden models.

Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw's thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw's teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
