

LONG-REACH SAW

10" • 15 tpi

Item #10-2310

Replacement blade #01-2310

Interchangeable blade

01-2310
Long Reach Saw
10" 15 tpi

01-2440
FineCut Double Saw
9-1/2" 17 & 9 tpi

01-2450
Super FineCut Double Saw
8-1/2" 23 & 18 tpi

Perfect for hard-to-reach projects, this long-handled saw cuts off rafter tails, reaches under decks, and makes all types of flush cuts. It even cuts PVC cleanly without burrs. The blade of this high-performance saw is made from the finest Japanese high-carbon spring steel. The fine teeth (15 tpi) on the 10" cutting blade are triple diamond-ground and electrically impulse-hardened for long-lasting sharpness and fast, effortless, exceptionally clean cuts. The Long-Reach Saw has a comfortable soft-grip handle and simple twist-lock blade for easy replacement and compact storage in nearly any toolbox.

Recommended For: Framing materials, PVC, all types of flush cuts

Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw's thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw's teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
