Replacement blade #01-2420

Interchangeable blade	
◦ 01-2210 ↗ Miter Saw 14" 18 tpi	◦ 01-2312 ↗ Gen. Carpentry Saw 12" 14 tpi
◦ 01-2420 ↗ FineCut Saw 10-5/8" 15 tpi	◦ 01-5450 ↗ Pruning Saw 12" 9 tpi
◦ 01-2214 ↗ Composit™ Saw 14" 9 tpi	

This new multi-purpose saw features a unique handle that adjusts to any angle to make short work of hard cuts. Loosen the knob and adjust the blade angle for the job: flush cuts, undercuts, cutting molding on the wall—wherever there is a tight fit. The blade is made from the finest Japanese high-carbon spring steel; its teeth are diamond-ground on three cutting edges and reach all the way to the tip of the blade—perfect for plunge cuts. The Multi-Angle Saw features a comfortable soft-grip handle and a simple, twist-lock blade for quick replacement and easy toolbox storage.

Recommended For: Flush cuts, undercuts, molding, cuts in tight situations

Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw’s thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw’s teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
