Composit™ Saw 14" 9 tpi	Pruning Saw 12" 9 tpi

This is the best all-around saw for professionals and do-it-yourselfers alike. With 14 teeth per inch, it cuts very fast and smooth. Because it is a pull-to-cut saw, undercutting (that is, from the bottom up) is a snap—unlike undercutting with a push saw! This is the best saw for tackling the widest range of projects; everything from rip and crosscuts to flush-cutting moldings and door casings—even slicing through PVC or ABS pipe. At 18" overall, it fits into most tool boxes. This is truly the must-have saw for everyone who appreciates a great hand tool.

**Recommended For:** Hard and soft woods, treated lumber, plywood, particle board, drywall and plastic pipe... wherever a fast, clean, and accurate cut is required.

### Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw's thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw's teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
