Gen. Carpentry Saw 18" 8 tpi	Heavy Duty Pruning Saw 15" 8 tpi
 01-2315	
Gen. Carpentry Saw 15" 10 tpi	

The largest, fastest-cutting model in the SharkSaw® line, this saw's 18" blade with aggressive 8-tpi pitch tears through the largest, toughest jobs you have. Ideal for general carpentry, post and beam construction, landscape timber, and railroad ties, it's the handsaw to have when power tools are unavailable (e.g., yards, fields, woods). Despite its relatively coarse 8 tpi, it cuts surprisingly clean, since the minimal set of the teeth slice through wood like a knife. Fast and accurate, this saw cuts through large stock with the finesse and speed to get tough jobs done.

Recommended For: Hard and soft wood; any large lumber for carpentry or landscape use; all large treated lumber; posts up to 12" in diameter (larger if rotation cutting is used); laminated lumber beams; railroad ties; firewood; large trees and branches.

Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw's thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw's teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
