Replacement blade #01-2450

### Interchangeable blade

01-2450	
Super FineCut Double Saw 8-1/2" 23 & 18 tpi	
01-2440	
FineCut Double Saw 9-1/2" 17 & 9 tpi	
01-2310	
Long Reach Saw 10" 15 tpi	

This traditional Japanese double saw is designed for fine finish work. Its very thin blade produces an ultra-thin kerf of just 0.019" and features 18-tpi and 23-tpi crosscut teeth for the smoothest and most precise cuts on all kinds of wood, from soft to exotic hardwoods. Each tooth is angled precisely and complements the specially designed blade and handle to deliver maximum efficiency and comfort. This is an excellent jamb saw for flush cutting molding and trim. It's also ideal for general finish work. The high-quality elastomer soft-grip handle features a twist lock for easy blade replacement and compact storage.

**Recommended For:** Finish work in all kinds of wood.

### Special SharkSaw® Features:

- **Pull-To-Cut:** The SharkSaw® blade cuts when drawn toward you. This results in a more natural, smoother, straighter, and less fatiguing sawing operation—due in part to SharkSaw's thinner blade.
- **Raker Tooth:** This special tooth cleans the sawdust out of the kerf as the blade is pushed forward.
- **Diamond-Ground:** SharkSaw® blades are precision diamond-ground to sharpen each tooth on three sides. The resulting blades are extremely sharp.
- **Impulse Hardening:** SharkSaw's teeth are electrically hardened to improve longevity. In fact, they hold their edge two to three times longer than conventional blades.
- **Soft & Comfortable Handle:** Industrial strength handle features rubber-like elastomer double-injection, non-slip grips, for long-lasting comfort.
- **Replaceable Blade:** Twist-lock design allows for fast, easy replacement of worn blades.
